

AHMED BASHEER

DATA ANALYST

ab11999333@gmail.com | linkedin.com/in/ahmed-basheer93 | github.com/ab1993-analyst | ab1993-analyst.github.io

PROFESSIONAL SUMMARY

Analytical, detail-oriented, and results-driven Data Analyst with a solid academic foundation in Computer Engineering and extensive hands-on experience managing complex operational database workflows. Synthesizes an engineering background with technical mastery of SQL, Python, Tableau, and Google BigQuery. Proven expert at auditing enterprise datasets, resolving system discrepancies, and designing interactive dashboards that directly optimize supply chain quality and business intelligence.

TECHNICAL SKILLS

- **Languages:** SQL (MySQL, PostgreSQL), Python (Pandas, NumPy, Matplotlib, Seaborn), R (R Studio, ggplot2)
- **Data Warehousing & Tools:** Google BigQuery, Google Sheets, Microsoft Excel
- **Data Visualization:** Tableau, ggplot2 (R), Interactive Dashboard Design
- **Core Competencies:** Database Auditing, KPI Tracking, Predictive Modeling, Root-Cause Analysis, Inventory Quality Control (ICQA), Cross-functional Leadership

PROFESSIONAL EXPERIENCE

Fulfillment Center Associate (Progression) — Amazon (OK & FL Locations) (2019 – Present)

- **Data Auditing & Quality:** Executed physical and digital database quality audits (ICQA) to maintain fulfillment database integrity, operating specialized PIT machinery (reach trucks and forklifts) to verify assets.
- **Anomalous Data Resolution:** Reconciled complex inventory metadata and system discrepancies during Vendor Receive and Problem Solve operations, utilizing internal database tracking tools to resolve asset data conflicts.
- **Data Standardization:** Audited and updated critical item metadata, including physical package dimensions and product weights, systematically improving sorting throughput and packaging algorithm efficiency.
- **Training & Leadership:** Selected as Learning Ambassador for picking operations; onboarded and mentored 50+ new associates on operational metrics, proprietary software platforms, and quality compliance guidelines.

Catering Operations Associate — Levy (Norman, OK) (2017 – 2019)

- **Logistics Coordination:** Directed time-critical delivery networks across campus sports venues, managing real-time food service logistics and distribution for major University of Oklahoma athletics events.
- **Team Collaboration:** Partnered with stadium kitchen hubs and field service teams to dynamically adjust inventory allocations, maintaining high standards of food safety, team coordination, and service quality.

KEY PROJECTS

Warehouse Fulfillment Analytics | Python, SQL, Google BigQuery, Tableau

- Programmed and analyzed a synthetic 1-Million-row database using Python and BigQuery to identify operational bottleneck patterns and shift-related performance anomalies.
- Developed interactive Tableau dashboards to track station error-rates, pick/pack quality, and shift productivity trends.

Customer Churn Analysis | R Studio, ggplot2, Exploratory Data Analysis

- Conducted predictive exploratory analysis on the IBM Telco Customer Churn dataset to isolate primary customer attrition triggers and mapped tenure vs. monthly charges using ggplot2 to assist retention strategy decisions.

Cyclistic Bike-Share Case Study | SQL, Google Sheets, Tableau

- Scrubbed and aggregated millions of rows of rider trip records to identify peak operational patterns and mapped out interactive recommendations to convert highly frequent casual riders into annual members.

EDUCATION & CERTIFICATIONS

Bachelor of Engineering (B.Eng.) in Computer Techniques / Computer Networks Communication

Dijlah University College — Baghdad, Iraq | Graduated: July 15, 2015

- **Degree Duration:** 2011 – 2015 (4-Year Program) | **Class Rank:** 36 of 82

Google Data Analytics Professional Certificate

Google / Coursera | Completed: July 2026
